

where learning, love and magic meet™

Kids Village

Skill Building Classes 2010!

When children learn to be self-reliant, self-confidence soars! This summer, give your child's confidence a lift with our skill building classes, bursting with creativity and imagination.

Classes for children ages 6 to 12

Cost is \$100 per course (four classes)

Each class will run for 4 weeks. Choose from one of two sessions:

First Session: June 9, 16, 23, 30

Second Session: July 7, 14, 21, 28

Classes will be held on Wednesdays from 10:00 am to 12:30 pm

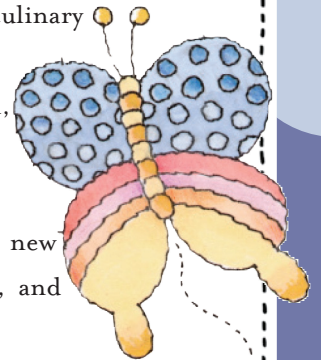

Please choose one of the four available classes below:

Fine Arts

Is there a masterpiece hidden in your imagination that you would like to share with the world? Then check out this course designed to develop your natural creative genius and build confidence in the fine arts. Studies show that when a child participates in fine arts, he or she gains greater achievement in the areas of reading, writing, language development, and mathematics. This course will have you drawing, painting, and sculpting, all in an enthusiastic and accepting environment. We will begin with the fundamentals, then encourage you to use those principles as a foundation for your own creativity. By month's end you will produce numerous works of art to present in an art show on the final day of camp.

In the Kitchen

- Become the next big chef on the cooking scene! Our
- executive chef will inspire your imagination as you
- create tasty delights, sumptuous delicacies, and
- extraordinary dishes representing the finest cuisine
- from around the world—all in our state-of-the-art,
- kid-friendly kitchen. This unique culinary
- experience will include hands-on
- instruction in food preparation,
- kitchen safety, nutrition, table
- setting, hosting, and mealtime
- etiquette. Become familiar with new
- flavors, build culinary confidence, and
- have a deliciously good time!

Concoctions and Contraptions

Fizz, gurgle, bubble, and brew—the magic of science is waiting for you! This course is full of fun for curious kids who like to ask “why.” If you’ve ever taken a moment to wonder at the marvelous world around you, you know that science is everywhere you look—from the air we breathe to the water we drink, from animals to weather, and everything in between. In this course we’ll be learning the essential steps to the scientific method. You’ll gain skills in critical thinking and problem solving as you work together on some truly electrifying experiments. Children who learn to love science grow up with an inquisitive spirit that will help them make sense of their world. Who knows what your next great discovery might be!

Pre-Kindergarten Prep

- Is your child ready for that much-anticipated transition into kindergarten? If he needs to gain a little extra confidence before the big day arrives, or if she’s so excited that she just can’t wait for the school year to begin, then this class is just the thing! We’ll focus on helping your son or daughter face the new social situations that come with kindergarten with self-assurance and a positive attitude. We’ll also work on solidifying your child’s understanding of letters, sounds, and numbers with fun games and activities. This milestone in your child’s life is a big step for both of you. Make sure it starts out on the right foot.

Schedule and Cost

Program	Date	Time	Cost before May 1st	Cost after May 1st
